*E- mailing save paper and petrol – it's good for the environment. Internet communication is cheap or free and it arrives immediately. So, I have the splendid possibility to use my "own area" so called to get in touch with everybody I would like to. Creating your site is the great chance to share your ideas as a specialist and ask for some pieces of advice, to show some interesting facts from your practice! If you have just ten or twenty minutes a day – go to your site and see new friends there!*

*As for the disadvantages of using and creating it ... Well, sometimes we can't access to the Internet at any place. And some kind of fear – will it be useful for people to use my site?*

*Anyhow CREATING OF YOUR OWN SITE is an exciting experience!*
