

Essay "Personal site: for and against"

Nowadays, the number of websites is extremely increasing. Some people believe that site is necessary for job. Others say it can not be rely on all the information. In my essay I am going to analyze these two points and decide which the solution is.

To start with, personal site is the brilliant source of getting loads of information for school work. That is lessons plans, games and competitions. It is all we and our students need for lessons. Besides site helps to keep ant present teachers' learning aids, collection of works and portfolio. Moreover, it is the best way now to publish your own materials without waste of time. Then you can get the serticate of it.

There are people who oppose personal sites. This is due to the fact that some works can not be reliable in the sites. People are not sure who they have been wtitten by or where they are borrowing.

All in all, I still feel that the benefits of having personal web site outweigh the disadvantages. I believe it is great when you can share your ideas of teaching, lesson materials with colleagues keeping the copyright.
