

There is no doubt that the twenty first century is the time of information, knowledge, and communication. The Internet provides a great variety of opportunities for that. Creation of your own Website is one of them. It cannot be denied, that a creative teacher will do his best to be up-to-date with the process of making teaching more affective and exciting.

To begin with, a personal teacher's site is the best source of helpful information for pupils, their parents and colleges. Besides, it saves pupils' time in finding a necessary file or site. What is more, it can be used in distance education of those pupils who are unable to attend school.

On the other hand, there are some people who argued that spending a lot of time in front of the monitors is very harmful for health. They are very tired of leading a sedentary lifestyle. They believe that teachers should reduce their endless work indoors and spend more time closer to nature, walking, playing active games outdoors or just reading a book in the park.

To sum up, I strongly believe that being engaged in the process of creating of your own Website is an exciting form of pedagogical activity. Of course, it is not only honorable to have it, but it is one of the ways of creating teacher's portfolio.
